

Open Position – Process Engineer

Holland Colours Americas Inc., located in Richmond, Indiana, headquarters of the Division Americas, is looking for a **Process Engineer**. Holland Colours develops, produces and commercializes solid and liquid colorants, masterbatches, and additives.

Responsibilities include:

- Identify, initiate and implement process improvements to production and safety processes.
- Assist and or lead 5S, PM, and TPM programs
- Assist with development and implementation of standards, policies and procedures according to engineering principles for production, maintenance and quality.
- Provide engineering support for all manufacturing products/processes and maintenance operations.
- Provide engineering leadership for installation/start-up of new processes and equipment.
- Develop and control capital expense budgets.
- Assist with development and control of maintenance budgets.

We are looking for candidates with the following qualifications/competencies:

- Bachelor's degree in industrial engineering or a related field or equivalent experience.
- 2-5 years of experience in engineering and/or maintenance preferred.
- Must be mechanically inclined.
- Previous supervisory experience preferred.
- Willing to be flexible and willing to do what needs to be done, even if what needs to be done is outside normal scope of job.
- Have and use above average project management skills.
- Understand process improvement and facility engineering requirements.
- Working knowledge of but not limited to processes, machinery (plant and lab), operation of dust collectors and repair procedures.

Holland Colors is an equal opportunity employer offering competitive wages and excellent benefits.
